About South Jersey Robotics (SJR):

SJR is a 501c3 nonprofit that provides STEM education through the creation of sustainable, robust robotics programs in Cumberland, Gloucester, and Salem Counties in NJ. SJR works with school districts & community organizations to provide access to STEM-related, FIRST®, and other programs to the 61,000 school-aged children in these counties. These programs help students build lifelong skills beyond engineering and robotics, such as public speaking, project planning & time management, which will help them succeed in life.
